Good Telephone Service Begins With You

You Can Help To Keep The Quality Of Your Telephone Service High By Following These Simple Rules:

1. Consult Your Telephone Directory Before Calling "Information."
2. Speak Directly Into The Transmitter In A Normal Tone Of Voice.
3. Be Quick In Answering Calls And Give The Other Party Ample Time To Answer.

A CONVENIENT SPACE FOR NUMBERS WHICH YOU USE OFTEN BOTH LOCAL AND LONG DISTANCE

Name	No.	Name	No.

Service Calls

To make a Long Distance Call	Call Long Distance
For Numbers Not in Directory	Call Information
To Report Telephone Out of Order	Call Service Dept.
For Business Transactions	Call Business Office

To Place a Long Distance Call

Tell the Long Distance Operator:

1. The city or town you want.
2. The out-of-town telephone number, if available, otherwise the name and address of the residence or business firm being called.
3. Your telephone number (and name if required) when requested by the operator.

When placing a station-to-station call, tell the operator you will talk with anyone who answers the telephone. If you wish to place a person-to-person call, simply give the operator the same information as above and the name of the particular person or department wanted.

Consult Your Directory

Keep your telephone directory handy and please use it . . . don't call or dial "Information" until you are satisfied the number you wish to call or dial is not listed in this directory.

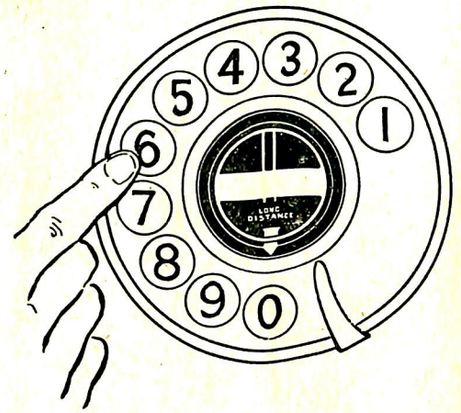
Party Line Service

1. Please limit all conversation to five minutes, as long conversations prevent the use of the line by those who share the line with you and by those who may wish to call you.
2. Whenever a party line subscriber takes the receiver from the hook and finds the line in use, the receiver should be replaced at once in a careful manner.
3. You would help your neighbor in an emergency so please give up the line to him if he has to place an emergency call while you are talking.

COPYRIGHT 1947 BY THE LINCOLN TELEPHONE & TELEGRAPH CO.

DIALING SUGGESTIONS

Suppose you want to call John Jones—the directory tells you his number is 6457.



1. Lift receiver and be sure to wait for the dial tone—a steady "humming" sound.

2. Place finger in opening where you see the figure "6."

3. Pull dial around until your finger strikes the stop. Remove finger and let dial return freely.

4. Do the same with each of the other figures in order.

5. A "bur-r-ing" sound tells you the telephone is ringing. A "buzz-buzz" indicates the line is busy. If you hear the busy signal, or if you do not hear either sound, hang up and after a reasonable wait, try the call again.

HOOK LATCHES

Some telephones are equipped with hook latches, which limit the initial movement of the receiver hook. When the receiver is removed, the partial movement of the receiver hook permits you to listen and determine if the line is busy. The release of the hook latch permits the receiver hook to move to its full operating position, connecting the telephone for dialing as soon as the dial tone is heard.

When answering your telephone be sure to release the hook latch.

Police—Dial 2-2231
Deweese Exchange—Dial 0 for Operator who will complete your call on a toll basis.
Clay Center Exchange—Dial 7, wait for dial tone, then dial the desired Clay Center number.
Clay Center Information—Dial 70

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) To determine if the desired number is on your line, inspect the telephone number you desire to call, and if the first, third and fourth figures of that number are the same as in your number, the party is on your line. For example, 3-4931 and 3-5937 are on the same line.

(2) To call a party on your line, dial "9" followed by that party's telephone number. After dialing, you will hear a busy signal. Hang up your receiver—this causes the other party's telephone to ring. Your telephone will ring also. When the ringing stops the called party has answered. You may then remove your receiver, trip the hook latch and talk.

TO PLACE AN EMERGENCY LINE RING ON RURAL LINES

(1) To place an emergency line ring to all subscribers on your line proceed as follows: Dial 9, the first figure of your number, 5, the third and fourth figures of your number, and 3. For example, if your number is **3-4112** you should dial **9-3-5-1-1-3**. The figures shown in blackface represent that portion of your own number used when placing an emergency line ring.

(2) Replace your receiver after dialing, and all telephones on the line will ring. When the ringing stops, remove the receiver, trip the hook latch and talk.

The emergency line ring is five short rings.

You may also place an emergency line ring by dialing "0" and request the operator to make your announcement.

SERVICE AND EMERGENCY CALLS

Long Distance	Dial 0		
Information	Dial 9	Fire (Day)	Dial 2221
Business Office	Dial 9	(Night)	Dial 2531
To Report Trouble	Dial 9	Police	Dial 9

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) If the second and third figures in the number you wish to call are the same as the second and third figures in your own number, the party is on your line. For example, 3974 and 4975 are on the same line.

(2) To call another party on your line, dial the number desired; a busy signal (a buzz-buzz-buzz) will then be heard. Replace your receiver, then the called party's telephone will be rung. Allow sufficient time for the called party to answer, remove your receiver and talk. Should the other party fail to answer, replace the receiver. On a rural line your telephone will ring also. The answer of the called party will stop the ring; you may then remove your receiver, trip the hook latch and talk. If the called telephone does not answer, you may stop the ringing of your bells by removing the receiver and tripping the hook latch.

TO PLACE AN EMERGENCY LINE RING ON RURAL LINES

To place an emergency line ring to all subscribers on your line, dial 5, then the second and third figures of your number, followed by 3. For example, if your number is 3974, you would dial 5-97-3.

Replace your receiver after dialing and all telephones on the line will ring. When the ringing stops, remove the receiver, trip the hook latch and talk.

The emergency line ring is 5 short rings.

You may also place an emergency line ring by dialing "9" and request the operator to make your announcement.

CLAY CENTER EXCHANGE

FRED ADKINS, Area Manager

Instructions for operating dial telephones may be found on Page 3.

SERVICE AND EMERGENCY CALLS

Long Distance	Dial 0	Fire (Day)	Dial 2-2222
Information	Dial 0	(Night)	Dial 2-2232
Business Office	Dial 8	Police	Dial 0
To Report Trouble	Dial 8	Sheriff	Dial 2-2051
Harvard Exchange	Dial 5		

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) To determine if the desired number is on your line, inspect the telephone number you desire to call, and if the first, third and fourth figures of that number are the same as in your number, the party is on your line. For example, 3-4931 and 3-5937 are on the same line.

(2) To call a party on your line, dial "9" followed by that party's telephone number. After dialing, you will hear a busy signal. Hang up your receiver —this causes the other party's telephone to ring. Your telephone will ring also. When the ringing stops the called party has answered. You may then remove your receiver, trip the hook latch and talk.

TO PLACE AN EMERGENCY LINE RING ON RURAL LINES

(1) To place an emergency line ring to all subscribers on your line proceed as follows: Dial 9, the first figure of your number, 5, the third and fourth figures of your number, and 3. For example, if your number is 3-4112 you should dial 9-3-5-1-1-3. The figures shown in blackface represent that portion of your own number used when placing an emergency line ring.

(2) Replace your receiver after dialing and all telephones on the line will ring. When the ringing stops, remove the receiver, trip the hook latch and talk.

The emergency line ring is five short rings.

You may also place an emergency line ring by dialing "0" and request the operator to make your announcement.

Police.....Dial 0

HOW TO DIAL ANOTHER TELEPHONE ON YOUR LINE

(1) To determine if the desired number is on your line, inspect the telephone number you desire to call, and if the first, third and fourth figures of that number are the same as in your number, the party is on your line. For example, 3-4931 and 3-5937 are on the same line.

(2) To call a party on your line, dial "9" followed by that party's telephone number. After dialing, you will hear a busy signal. Hang up your receiver—this causes the other party's telephone to ring. Your telephone will ring also. When the ringing stops the called party has answered. You may then remove your receiver, trip the hook latch and talk.

TO PLACE AN EMERGENCY LINE RING ON RURAL LINES

(1) To place an emergency line ring to all subscribers on your line proceed as follows: Dial 9, the first figure of your number, 5, the third and fourth figures of your number, and 3. For example, if your number is 3-4112 you should dial 9-**3-5-1-1-3**. The figures shown in blackface represent that portion of your own number used when placing an emergency line ring.

(2) Replace your receiver after dialing, and all telephones on the line will ring. When the ringing stops, remove the receiver, trip the hook latch and talk.

The emergency line ring is five short rings.

You may also place an emergency line ring by dialing "0" and request the operator to make your announcement.
